SOFTWARE QA ENGINEER

Eurovision Services is seeking Software QA Engineers to join the international software engineering team in our brand-new office in Madrid, Spain.

ABOUT EUROVISION LABS

Eurovision Labs in Madrid is the new technology hub for the EBU's new subsidiary, Eurovision Services. The Labs will be responsible for delivering media & broadcast core solutions applying the most advanced software engineering techniques. The new offices in Madrid are specifically designed to boost creativity and facilitate innovation and learning in an amicable work environment. As part of the technology team, you will be working with top international engineers specialized in media while seeing your developments applied in Tier-1 worldwide sports and news content. The Software QA Engineer will be part of a small, talented and motivated core team that will support Eurovision Services in delivering the most innovative and reliable solutions for our customers around the world.

PRINCIPAL RESPONSIBILITIES OF THIS POSITION

In this role as Software QA Engineer you will:

- Be responsible for validating our next generation of web applications based on Agile/SCRUM methodology,
- Analyze requirements, design and write test cases for new features and user stories,
- Execution of both manual and automated test cases,
- Evaluation of the test case results,
- Prepare and execute unit and integration tests,
- Identify and report defects and their root causes using Jira,
- Design and implement QA automated procedures integrated in the development cycle,
- Work closely with the development teams following our continuous integration workflow,
- Generate documentation in English,
- Monitor software quality, from code quality to platform reliability.

YOUR SKILLS AND EXPERIENCE

The successful candidate must have some experience working as part of a software development team.

- Hands-on-lab experience in automatization tools and relevant software development tools, including version control, build processes, debuggers, QA frameworks (Jira, Tosca, Jenkins 2, Selenium, etc.),
- Scripting language and programming experience (Java, Python, Linux shell, etc.),
- Experience on Linux or Windows running tools, scripts and applications themselves,
- Self-management and ability to work independently with limited supervision.

ADDED VALUE

Additional experience in the following areas would be a bonus:

- Experience working collaboratively with geographically distributed and international teams (our headquarters are located in Switzerland),
- Some experience in OTT/Media/Broadcast software development projects,
- Knowledge of digital video concepts (container formats, codecs, compression schemes, tools, best practices, etc.).
- ISTQB certification.

Perhaps you are missing some of the listed skills and required experience, but you are self-motivated and eager to learn? Then we still want to meet you!

ONCE ON BOARD YOU WILL

- Be part of an outstanding multi-cultural and international team of software engineers,
- Get involved in Tier-1 media projects with impact and visibility,
- Occasionally travel to our headquarters in Switzerland for workshops and training,
- Enjoy our labs, designed to foster a culture of sharing, openness and creativity,

EDUCATION

Degree in Computer Science, Software Engineering, Telecommunications Engineering or similar degree (Master or Bachelor).

BENEFITS AND PERKS

Competitive salary and benefits.

ABOUT US

Great events don't happen by accident. Event organizers, media organizations and sport federations need adaptable, end-to-end solutions to produce, distribute and personalize content to the right audiences, at the right time, in the right format.

We aim to be the first-choice media services provider to clients by providing new, better and different ways to simply, efficiently and seamlessly access and deliver content and services.

Our service portfolio is designed to offer the agility and ability to enhance and adapt content to the needs of all digital platforms. But what really sets us apart is that we see the bigger picture.

As an EBU company, we are in a unique position to understand the needs and challenges our clients face. That's why we guarantee to maximise their content value while leaving them free to focus on every other aspect of running the most successful event possible.

We are Eurovision Services. We deliver excellence in everything we do, to leave others free to focus on what really matters – creating truly amazing experiences.
